Education

Bachelor of Technology in Computer & Electronics Engineering

2023 – Present

KJ Somaiya College of Engineering

Latest SGPA: 9.83 | Honours in Data Science & Analytics (GPA: 10.0)

HSC, Science – Nirmala Memorial Foundation

2021 – 2023

SSC – St. Joseph's Convent High School

2011 – 2021

Technical Skills

Languages: C/C++, Python, Java, Kotlin, HTML, CSS, JavaScript, TypeScript

Frontend: React, Vite, Bootstrap, Responsive Web Design

Backend & APIs: Node.js, REST APIs, Authentication, Supabase Authentication

Databases: MySQL, PostgreSQL, Supabase, SQL, Relational Databases

Tools: React, Node.js, Vite, Bootstrap, Android Studio, Gradle, Git, GitHub

Coursework: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, Software Engineering, Machine Learning

Professional Experience

BuildUp Mirai | Project Manager

Dec 2025 – Mar 2026

- Worked on the development of a centralized business dashboard for company-wide reporting, KPI tracking, and operational workflow automation.
- Collaborated with developers to translate business requirements into dashboard features, data views, user flows, and implementation tasks.
- Designed and configured automation workflows for scheduled email notifications and WhatsApp reminders to reduce manual follow-ups.
- Coordinated testing, issue tracking, and deployment support for client-facing solutions across two parallel projects.
- Mentored interns on project tasks, documentation, requirement understanding, and delivery ownership.

U&I | Volunteer

July 2025– May 2026

- Volunteered in education-focused initiatives to support learning outcomes for underprivileged children.
- Assisted with lesson planning, classroom activities, student engagement, and volunteer coordination.
- Helped maintain communication within the volunteer group to support smooth session execution and student progress.

Projects

CareCompanion | Kotlin, Android Studio, Gradle

- Developed an Android healthcare companion application to help users manage wellness-related tasks and daily health routines.
- Built app screens for daily schedules, medicine management, emergency contacts, and wellness/SOS support features.
- Implemented user-friendly navigation and structured UI flows.

Healthcare Vitals Tracker | React, TypeScript, Supabase, PostgreSQL

- Built a healthcare vitals tracking platform for users to securely log in and record blood pressure and blood sugar readings.
- Integrated Supabase for database management, email authentication, and secure storage of user-specific health records.
- Designed timestamped vitals history with protected access so each user can view and manage only their own health data.

Puzzle Grove | HTML5, CSS3, JavaScript, Bootstrap

- Engineered a multi-game word puzzle platform inspired by Wordle, Connections, and Anagrams.
- Implemented authentication, session management, streak tracking, and achievement-based progression.
- Developed a responsive mobile-first interface using Bootstrap, CSS Grid, and Flexbox for cross-device usability.
